What a difference a **GREAT SMILE** makes in your life!

At Lakeside Family Dentistry, we're committed to making as many people as possible smile. Our dental team, led by Anthony W. Boe, DDS, has been creating beautiful smiles for thousands of patients in the West Metro area. Whether you need whiter teeth, a single-visit crown or a straighter smile, we can help you smile your best.

So many reasons for you to **SMILE**

Our patients know they will always receive caring, gentle dentistry from our team and experienced dentist with an exceptional chairside manner and a great reputation in the community. They will always feel comfortable and confident that they are getting high-quality cosmetic, restorative and preventive dental care.

So many **ADVANCED** smile-enhancing options

What can we do for your smile? Everything from a full cosmetic makeover to color-matched fillings. Here are our most popular smile-enhancing treatments and services:

- CEREC and traditional crowns and bridges
- Invisalign
- Bleaching, whitening
- Cosmetic bonding
- Implant restorations
- Tooth-colored fillings
- Veneers

Cosmetic and Restorative **DENTISTRY**

Dr. Boe believes that anyone can have a beautiful smile and enjoy the benefits of higher self-confidence and success in every aspect of their life. He offers cosmetic treatments such as veneers, teeth straightening and teeth whitening and restorative procedures such as crowns, bridges and implant restorations.

VENEERS

These thin “shells” are bonded to the front teeth to correct spaces between teeth, broken teeth, discolored teeth and crooked teeth. And if your teeth are chipped or beginning to show signs of wear, veneers can protect them from damage and restore their appearance. Veneers can transform your whole look with a “designer” smile!

INVISALIGN

Invisalign clear aligners work to straighten your smile without anyone knowing. They are an excellent option if you are conscious about your image because they are virtually invisible. If you're in your teens or older and have crooked teeth or gaps in your smile, you should consider this comfortable, removable alternative to ceramic or metal braces.

CEREC® and traditional crowns

Dr. Boe uses porcelain crowns to restore a tooth's strength and beauty. He offers a revolutionary system, CEREC, that allows him to design, create and fit a new crown in a single visit, unlike traditional crowns that require multiple visits. CEREC uses tooth-colored ceramic materials to restore teeth to their natural strength, beauty and function.

Other SERVICES

Everything we do is focused on your satisfaction and the health of your smile. That's why we also offer:

- Children's dentistry
- Periodontal (gum care) services
- Endodontics (root canal therapy)
- TMJ/TMD appliances
- Extractions

"I enjoy having the ability to help people have better smiles and long-lasting oral health. I hope to give every patient the highest-quality care in the gentlest, most comfortable manner. I have a great deal of compassion for my patients, and I'm sensitive to the fact that many people dislike seeing a dentist. I want everyone to feel comfortable when they visit."
